

Golden Abrasives

INDUSTRIAL ABRASIVES PRODUCTS

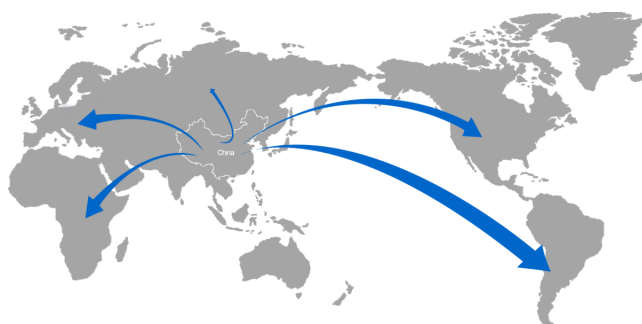

COMPANY PROFILE

Golden Abrasives is a leading manufacturer of abrasive products in China since 2003.

We have three manufacturing bases in Jiangsu, Shanghai and Guangdong, and owns a professional exporting company to establish a complete supply chain system. It owns advanced full automatic production lines, conversion lines and well-equipped R&D center. Golden Abrasives strives to produce the premium quality abrasives to meet the high expectations of our customers, we strictly control our products quality from raw material to finished products to ensure consistent quality and timely delivery. Our R&D center can efficiently provide you professional solutions to a wide variety of industrial applications.

Being a manufacturing enterprise, we pay more attention to our long term business customers and provide OEM service to support our valuable customers to develop their own brand.

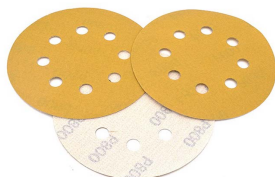

We keep developing new products and quality systems through strong investment in research and development. We supply a wide range of abrasive products worldwide including Asia, America, Europe, Middle East.

DRY ABRASIVE PAPER

AY33

Grit Range	Grain	Backing	Bonding	Coating	Anti-clogging Layer
P80-P1000	Semi friable Aluminum Oxide	Cwt latex-reinforced paper	Resin over Resin	Open coating	Invisible coating

Features

- Shape-selected grains
- Flexible paper backing
- Open coated grits
- Complete polishing solution

Benefits

- Better polishing surface quality and longer service life
- Good adoption to profiled surface
- Perfect anti-clogging performance
- From filler to painting for Automotive industry

Applications

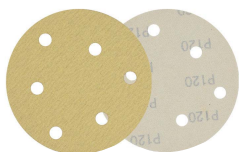

- Automotive painting and refinishing
- Better surface quality on paints sanding and polishing
- Flatting of filler and putty, lacquer to painting

Form

AY309

Grit Range	Grain	Backing	Bonding	Coating	Anti-clogging Layer
P40-P800	Semi friable Aluminum Oxide	Cwt latex-reinforced paper	Resin over Resin	Closed coating	Invisible coating

Features

- Better cost effective
- Close coated grits
- Cwt latex paper backing
- Extra coating layer

Benefits

- Ideal for general purpose
- High stock removal rate
- Good tear-resistance performance
- Improved anti-clogging performance

Applications

- Automotive painting and refinishing
- Better surface quality on paints sanding and polishing
- Flatting of filler and putty, lacquer to painting
- Sanding wood and metal

Form

AY36

Grit Range	Grain	Backing	Bonding	Coating	Anti-clogging Layer
P80-P1000	Semi friable Aluminum Oxide	Latex-reinforced Cwt paper	Resin over Resin	Open coating	Special anti-clogging layer

Features

- Premium semi-friable aluminum oxide grain
- Unique Cwt latex reinforced paper backing
- Additional coating layer

Benefits

- Faster cut rate, superior service life
- More flexible can be folded without cracking
- Good Anti-clogging performance on painting & putty

Applications

- Automotive painting and refinishing
- Flatting of body filler and primer filler
- Sanding out unevenness at the edges of repaired surface

AP66

Grit Range	Grain	Backing	Bonding	Coating	Anti-clogging Layer
P40-P1000	Precision Shaped Ceramic	Cwt latex-reinforced paper	Resin over Resin	Open coating	Invisible coating

Features

- Precision Shaped Ceramic
- Flexible Cwt paper backing
- Special anti-clogging coating
- Complete sanding solution

Benefits

- Self-sharpening performance and consistent finish
- Good flexibility and good adoption on work pieces surface
- Prevent clogging from sanding dust, and improve better sanding performance.
- From heavy sanding to finishing for Automotive industry

Applications

- Coarse Sanding for paint and filler
- Feather edging
- Paint Removal
- Glass fiber and reinforced plastic

Form

AY312

Grit Range	Grain	Backing	Bonding	Coating	Anti-clogging Layer
P60-P800	Premium Aluminum Oxide	High latex content C-weight paper	Resin over Resin	semi-open coating	Special anti-clogging layer

Features

- Premium Aluminum Oxide
- High latex content C-weight paper
- Additional coating layer and open coating

Benefits

- Better cost-effective for general manual sanding purpose
- Flexible backing to guarantee good tear-resistance performance
- Anti-clogging, resistance to clogging and loading during sanding

Applications

- Primary paint grinding
- Wood and synthetic material grinding and polishing
- Wood veneer sanding

Form

AR85

Grit Range	Grain	Backing	Bonding	Coating	Anti-clogging Layer
P60-P800	Premium Aluminum Oxide	Fiber-reinforced Cwt latex paper	Resin over Resin	semi-open coating	Special Anti-clogging layer

Features

- Premium Aluminum Oxide
- Fiber-reinforced Cwt paper
- Additional coating layer and open coating

Benefits

- Better cost-effective for general manual sanding purpose
- Flexible backing to guarantee good tear-resistance performance
- Anti-clogging, resistance to clogging and loading during sanding

Applications

- Primary paint grinding
- Wood and synthetic material grinding and polishing

Form

WATERPROOF SANDPAPER

SC33

Grit Range	Grain	Backing	Bonding	Coating	Anti-clogging Layer
P60-P2000	Silicon Carbide	Kraft paper	Resin over Resin	Closed coating	None

Features

- Silicon carbide grains
- Stiff Cwt Kraft paper backing
- All resin bonding

Benefits

- Produces a smoother finish than aluminum oxide
- Multi-purpose wet sanding in a wide range of industries
- Withstand tougher-than-usual jobs to last longer

Applications

- Automotive painting and refinishing
- Wet sanding of primer-surface
- Sanding of filler and lacquer

Form

SC34

Grit Range	Grain	Backing	Bonding	Coating	Anti-clogging Layer
P60-P3000	Silicon Carbide	15% latex Cwt paper	Resin over Resin	Closed coating	None

Features

- Wet conditions premature loading
- Exceptionally flexible paper backing
- Uniformity of scratch pattern

Benefits

- Prevent clogging on painting and non-ferrous metal
- Eliminating the need for "pre-soaking" in water
- Optimum substrate preparation

Applications

- Automotive painting and refinishing
- Sanding of primer, putty, filler and lacquer
- Paint preparation

Form

SC36

Grit Range	Grain	Backing	Bonding	Coating	Anti-clogging Layer
P60-P5000	Black Silicon Carbide /Green Silicon Carbide	30% latex Cwt paper	Resin over Resin	Closed coating	None

Features

- Excellent flexibility of soaked material
- Flexible Cwt curl-resistance 30% latex paper
- High strong and flexibility paper

Benefits

- Extended soaking is no longer necessary
- High grinding efficiency and good polishing performance
- High tear resistance & diversified application areas

Applications

- Automotive painting and refinishing
- Painting blemish paint preparation
- Mainly grinding and polishing precision instruments

Form

SC39

Grit Range	Grain	Backing	Bonding	Coating	Anti-clogging Layer
P60-P5000	Special treated aluminum oxide and silicon carbide	30% latex Cwt paper	Resin over Resin	Closed coating	Special anti-clogging layer

Features

- Special treated aluminum oxide and silicon carbide
- High latex content C-weight paper
- Additional coating layer and open coating

Benefits

- Better cost-effective for general manual sanding purpose
- Flexible backing to guarantee good tear-resistance
- Resistance to clogging and loading during sanding

Applications

- Sanding and polishing auto body repair
- Grinding and polishing lacquer, metal, plastic, stone, woodworking

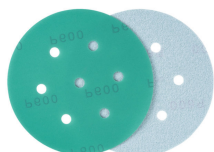

Form

ABRASIVE FILM

AG312

Grit Range	Grain	Backing	Bonding	Coating	Anti-clogging Layer
P60-P2000	Zirconium Alumina	Polyester film backing	Resin over Resin	Semi-open coating	Invisible coating

Features

- Mixed with zirconium grain at coarse grits
- Precision shaped semi-friable grain at fine grits
- Polyester film backing

Benefits

- High stock removal rate
- Uniform polishing surface
- Much more durable than paper backing

Applications

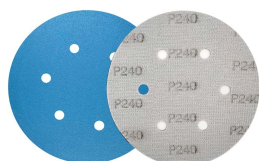

- High gloss polishing
- Aluminum alloy and nonferrous metal
- Automotive painting and refinishing

Form

AG331

Grit Range	Grain	Backing	Bonding	Coating	Anti-clogging Layer
P60-P2000	Zirconium Alumina	Polyester film backing	Resin over Resin	Semi-open coating	Invisible coating

Features

- Mixed with zirconium grain at coarse grits
- Precision shaped semi-friable grain at fine grits
- Polyester film backing

Benefits

- High stock removal rate
- Uniform polishing surface
- Much more durable than paper backing

Applications

- High gloss polishing
- Aluminum alloy and nonferrous metal
- Automotive painting and refinishing

Form

AG781

Grit Range	Grain	Backing	Bonding	Coating
P40-P2000	Premium Ceramic	Polyester film backing	Resin Over Resin	Open coating

Features

- Ceramic grain is more dense, rough, firm and sharp
- Supper self-sharpening, constantly revealing new
- Electrostatic coating of film substrate prevent clogging
- Match strict micro-dust grinding

Benefits

- Better efficiency for heavy sanding
- Provide longer service life time
- Much more durable than paper backing, and provide uniform polishing surface,
- Improve grinding efficiency

Applications

- Coating and primer grinding in the automotive industry
- Metal sanding and polishing
- Hard wood and composite material polishing

ABRASIVE SPONGE

SP500

Dimension	Grain	Grit	Backing	Foam type	Bonding	Coating
100*70*25mm	Premium aluminum oxide	60#-280#	Foam PU (Polyurethane solvent free)	Medium hard	Resin over Resin	4-sided

Applications

- Fine sanding of wood, lacquer, high gloss, paint defects and runs, orange peel, filler, primer, plastic, composites, universal metal, dry and wet sanding.

Color

- Grey, blue and colorful sponge are available

SP501

Dimension	Grain	Grit	Backing	Foam type	Bonding	Coating
98*87*26mm	Premium aluminum oxide	60#-280#	Foam PU (Polyurethane solvent free)	Medium hard	Resin over Resin	4-sided

Applications

- Hard-to-reach areas, fine sanding of wood, lacquer, high gloss, paint defects and runs, orange peel, filler, primer, plastic, composites, universal metal, dry and wet sanding.

Color

- Grey, blue and colorful sponge are available

SP502

Dimension	Grain	Backing	Foam type	Bonding	Coating
120*98*13mm	Premium aluminum oxide	Foam PU (Polyurethane solvent free)	Soft foam	Resin over Resin	2-sided

Applications

- Hard-to-reach areas, such as door handle depressions, bumpers, radiator grilles, fine sanding of wood, lacquer, high gloss, paint defects and runs, orange peel, filler, primer, plastic, composites, universal metal, rubber, leather, dry and wet sanding.

Color

- Regular sponge color: Grey, Blue, Green, Black;
- Customized sponge color: Orange and Yellow.

Jiangxi Golden Abrasives Co., Ltd.

Head office Add: Building A, Ruishi intercity Plaza, Honggutan District, Nanchang City, Jiangxi Province.

SP710

Dimension	Grain	Foam type	Bonding	Coating
115*140*5mm	Premium white aluminum oxide	Soft foam	Resin over Resin	Single sided

Applications

- Paint, Metal, Putty, Fiberglass, Primer

Grit

- Medium, Fine, Superfine, Ultrafine, Microfine.

Backing

- Foam PU (Polyurethane solvent free)

SP805

Grit Range	Grain	Backing	Bonding	Color	Overall Diameter (Metric)
P320-P3000	Silicon carbide	Knitted Fabric on foam	Resin over Resin	Grey	150 mm

Features

- Open-cell structure
- Even surface pressure
- Higher density foam layer
- Flexible weave allows water and air to pass freely

Benefits

- Retains water exceptionally well during wet sanding operations
- Smooth Sanding of Contours and Edges
- Flexible construction allows it to create a smooth sanding pattern on angled surfaces and edges
- Makes it suitable for both dry and wet sanding

Applications

- It's especially well suited for manufacturing and refinishing stages in the marine and automotive sectors, and performs very well when sanding glass or other transparent surfaces.

SP998

Grit Range	Grain	Backing	Bonding	Coating	Color
P60-P1000	Premium Aluminum oxide	Cwt-latex paper, PE foam	Resin over Resin	Semi-open coating	Gold

Features

- Soft and elastic base paper
- Premium aluminum oxide grain
- Special anti-clogging coating

Benefits

- Guarantee good flexibility and work pieces having smoother finishes
- Provide excellent grinding and consistent finish surface
- Prevent clogging from sanding dust and improve the product performance

Applications

- Automotive Refinishing
- Paint & Decoration
- Wood Processing
- Marine Industry
- Vehicle Manufacturing

ABRASIVE PYRAMID

SP669

Grit Range	Grain	Backing	Product Color	Overall Diameter (Metric)
P1000-P5000	Silicon Carbide	Hook & Loop	Gray, Blue	75mm, 125mm, 150mm

Features

- Three-dimensional mineral abrasive structures
- Paint Finishing System for high gloss and deep color paint finishes
- Patterned, precise mineral structures

Benefits

- Uniformly distributed over the surface of the abrasive, eliminate extra material and even full stages in specific cases
- Ideal for refining sand scratches to help reduce the amount of time spent compounding
- Provide fast cutting rate and wear evenly for consistent finishes

Applications

- Repairing large area for paint defects, headlights, metal parts, plastic parts, acrylic, high toughness objects.

PF581

Grit Range	Grain	Backing	Bonding	Coating	Micron Grade
P2000-P5000	Silicon Carbide	PET FILM	Resin over Resin	Closed Coat	A3,A5,A7,A9

Grain Side color

- Gray/Purple/Light Green/Dark gray

Benefits

- Trizact abrasives start sharp and stay sharp, resulting in more predictable finishes and consistent results.
- Ideal for the two-step paint defect repair process for automotive finishes.
- Well suited for using on mini random orbital sanders to produce a polish-ready finish.
- Silicon carbide mineral in three very fine micron grades

Applications

- Automotive primer sanding, finish polishing and grinding, medium paint sanding, electrophoretic paint defect grinding.
- Suitable for creating high gloss level for glass defect repair, it is well suited for using on mini random orbital sanders to produce a polish-ready finish.

ABRASIVE FLEXIBLE FILM

F890

Grit Range	P600-P3000
Grain	Premium Aluminum Oxide
Backing	Very Flexible Film
Bonding	Flexible Resin
Coating	Semi-Closed
Form	

Benefit

- Adopt special TPU film as backing, which it's high flexibility, durable, water and oil resistant. It's a new developed coated abrasive products with environmentally friendly material.
- Adopt high strength resin and combined well with film base material, it makes more flexible, perfect match and sharpness.
- Thanks to the special technology and coating, the workpiece won't be changed the color with smooth surface during sanding.
- Fully open coating with the special flexibility and strength, the film won't be cracked or out of shaped after grinding. It's water and oil resistance, so it's well suitable for polishing curved surface and three -dimensional workpiece.

Applications

- Automotive Industry: paint. putty polishing and surface repair refinish;
- 3C Electronic industry: Aluminium-magnesium alloy grinding, Sanding cell phone case, Polishing tablet computer and so on;
- Woodworking, musical instruments, cabinet industry.

ABRASIVE NET

AM685

Grit Range	Premium Aluminum Oxide
Grain	P80-P1000
Backing	PA net
Bonding	Resin over Resin
Coating	Closed
Color	Grey

Applications

- It's especially designed for the automotive refinishing, provide amazing dust extraction ability.
- The special net construction eliminates clogging and ensures a long lifespan, reduce edge wear in finer grits and a versatile range.

Abrasive net forms

AM686

Grit Range	Premium Ceramic
Grain	P80-P1000
Backing	PA net
Bonding	Resin over resin
Coating	Closed
Color	Light Maroon

Applications

- It's developed for achieving outstanding results on challenging surface conditioning and repair applications.
- Thanks to its optimized net construction and ceramic grains, provide superior cutting performance for hardwoods and fast cutting on various solid surface, and works excellent on primer sanding applications.

Abrasive net forms

NON-WOVEN ABRASIVES

NW815

Grain

Aluminium oxide (GP,VF)/
Silicon carbide (UF,MF)

Backing

Non-woven

Grit

P320-P2500

Bonding

Resin over Resin

Coating

Three Dimensional coating

Color

Green (GP)/Red (VF)/
Dark grey(UF)/Brownish (MF)

Applications

- It's flexible, three-dimensional fiber sanding material to make it effective for getting into hard reach areas to provide a uniform finish surface.
- It is also suitable for finishing contour surface and polishing surface preparation.

Form

NW816

Grain

Aluminium oxide (VF)/
Silicon carbide (XF,UF,MF)

Backing

Non-woven

Grit

P360-P2500

Bonding

Resin over Resin

Coating

Three Dimensional coating

Color

Red(VF)/Black(XF)/
Grey(UF)/Beige(MF)

Applications

- It features an open and flexible structure and strengthened fibers, make it strong and long-lasting service life time.
- It produces a dense scratch pattern and rapid result.
- It is suitable for sanding and finishing applications and suitable for automotive refinishing and metalworking industry.

FLEXIBLE ABRASIVE CLOTH

TJ113

Grain	Aluminum oxide
Backing	J-wt cotton
Bonding	Resin over Resin
Grit Range	P60-P600

Form

Features

- Flexible backing, used for sheet, shop roll, and hand use.

Applications

- For manual grinding application in general metalworking, woodworking and lacquer.

TJ135

Grain	Aluminum oxide
Backing	J-wt Poly/Cotton
Bonding	Resin over Resin
Grit Range	P60-P600

Form

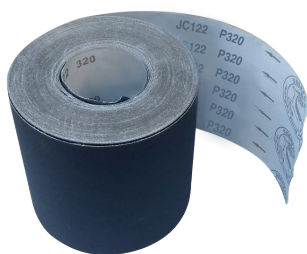

Features

- Soft and tensile, used for narrow belt.

Applications

- For general metalworking, woodworking.
- For pinewood, furniture, hardware and general metal.

JC122

Grain	Silicon Carbide
Grit Range	P60-P1000
Backing	J-wt Poly/Cotton
Bonding	Resin over Resin
Coating	Close coat

Form

Features

- Wear-resisting, heat-resisting, skidproof, high working efficiency, better surface performance.

Applications

- Brass alloy, Copper alloy, Titanium alloy & Glass & Non-ferrous metal, Copper, Aluminum.

FLAP DISC

Advantages

- Our products are much more quiet than the other products when you use it.
- With poly-cotton backing for fast stock removal and cooler grinding on stainless steel.
- Aggressive stock removal rate and longer service lifetime.

Applications

- Aggressive stock removal on harder materials.
- For general grinding and finishing on stainless steel and carbon steel.
- Aggressive stock removal on a variety of welds, castings, and other metal fabrication.

ROLOC FLAP DISC

Size	2 inch-3 inch
Grain	Aluminum oxide Calcined A/O Zirconium Alumina Ceramic
Grit range	P36-P320
Mounting type	TR/TS

Advantage

- Ideal disc for material removal and blending on ferrous metals where accessibility is a problem or the work area need to be kept to the minimum.
- Improved access to hard to reach areas.
- Minimizing the area of repair to reduce time spent on further finishing operations.
- Exceptional service lifetime compared to traditional coated abrasives discs of the same diameter.
- Quick change locking systems for convenient.

Applications

- Ideal for grinding, stock removal, beveling, weld blending, deburring, rust removal, cleaning and finishing on a wide range of metal, along with non-ferrous metals.

FLAP WHEEL WITH SHAFT

Flap wheel with shaft

Advantages

- It can be allowed to sand inside corners with excellent durability and superior flexibility.
- Different types available for using from grinding, finishing, and final polishing.

Applications

- General-purpose for weld removal and deburring to final polishing.
- Sanding for inside corners and contours.
- Provide more smooth finishing surface.
- Deburring and finishing for polishing stainless-steel and non-ferrous metals.

FIAP WHEEL

Advantages

- Our products are formed with up to 25% more flaps for excellent performance in production applications
- Made by precision-shaped aluminum oxide grain on Xwt cloth backing for long lifetime service and flexibility
- Their rotation provides a grained, or linear surface finish

Applications

- Sanding for stainless steel panels and food preparation equipment
- Deburring & polishing & grinding stainless steel
- Aluminum and general purpose for metal
- Seamless connection for large surface of stainless steel panel
- Special design for stainless tube

Grit range	Size (OD*W*ID)	Type	Remark

FIBRE DISC

DF112

Grit Range	P24-P120
Grain	Aluminum Oxide, Zirconium Alumina, Silicon Carbide, Ceramic
Backing	Fibre
Bonding	Resin over Resin
Maximum Speed	8,600 rpm, 12,000 rpm, 13,300 rpm, 6,600 rpm, 15,300 rpm
Overall Diameter (Metric)	177.8 mm, 127 mm, 114.3 mm, 231.775 mm, 101.6 mm
Attachment Type	GL, Center Hole, TN

Features

- Long-lasting abrasive helps reduce cost
- Rapidly cuts carbon steel
- Premium mineral excels at heavyweight applications such as weld grinding, beveling, and edge chamfering
- Stiff fiber backing and strong resin bond provide durability and tear-resistance

Advantage

- Premium abrasive grain provide higher cutting rate with less pressure during sanding
- Constructed with durable bonding, providing greatest possible resistance to side pressure and bending
- Stiff fiber backing and strong attachment to guarantee safety
- Economy of scale offers advantage of stable products quality and good price

Applications

- It's widely used for weld removal, grinding, and blending large and small areas of metal surfaces.
- It features a tough, stiff backing made from vulcanized fiber that resists wear and can handle tough grinding applications.
- It is an excellent choice for high-pressure applications.
